

As of March, 2019, at least 506 veterans and others who were exposed to toxic smoke from the burn pits in Iraq and Afghanistan have reported to Burn Pits 360 what they believe to be service related cancers that they are now receiving treatment for.

THE TOP 10 CANCERS SO FAR ARE

Skin (139)

Soft Tissue Sarcoma (42)

Lymphoma (116)

Lung (39)

Brain (97)

Testicular (39)

Esophageal (45)

Prostate (34)

Leukemia (42)

Blood (31)

The Veteran's Administration maintains that their research does not show evidence of long-term health problems from exposure to burn pits.
